

Beer lovers want to be able to enjoy beer the way it is meant to be served - on draft. A beer dispenser is a necessity for the beer lover passionate about their bar, leaving it on the counter top showing off to friends.

This compact unit features Traditional Pub Keg Tapping for direct to glass serving, and contains a dual system operation: CO₂ for Non-pressurised 5L kegs and Standard for Pressurised 5L kegs .

The Chamber Draft Beer Dispenser has an upscale appeal; its black exterior with stainless steel is designed to look at home on a kitchen counter top or at your bar. This draft beer dispenser and cooler has been designed for use with 5L kegs and comes with everything needed to pour great beer in the comfort of your home. Something fun to entertain with when friends are around or just on your own!

The keg will stay fresh and cold for over a month with the unit switched on. Even if your beer goes flat or you enjoy extra bubbles the CO₂ adaptor will re-carbonate your drink. Juices, squashes or plain water can be carbonated too and permanently on tap (CO₂ gas and refillable keg sold separately).
